

System Requirements

Minecraft Mod Development

Minimal System Requirements:

- Operational System (OS) - Windows 7+ or Linux (>2.6 kernels) Ubuntu/Debian/... or Mac OS X 11+ 64-bit architecture and operating system
- RAM - 4 GB or more (2 GB is enough for data pack and add-on maker, but not for Java-based mods)
- Processor (CPU) - 2 core CPU Intel/AMD
- Free hard disk space – 1 GB of free storage
- Internet connection - 15-20 Mbps
- Block Bench - the editor can be installed on your Windows, Mac or Linux computer, or it can be used with a web application.
