# Tablet PC

# recomendations

The best start samples:

## 1) One by Wacom Tablet

- As simple as possible, compact, without buttons, a small handy stylus pen, similar to a common pen

## 2) XP-Pen Deco 01

- Sensitive, lightweight, solid, large work surface, durable tips, programmable keyboard shortcuts on the side panel. The pen stylus looks more like an ergonomic marker for calligraphy

XP-Pen Deco has several new models.  
They all are ok, there's no real difference.
